

# Som Shrivastava

Boston, MA | 732-662-8615 | shrivastava.so@northeastern.edu | github.com/somshrivastava | linkedin.com/in/somshrivastava

## EDUCATION

### Northeastern University, Khoury College of Computer Sciences

Boston, MA

*Candidate for Bachelor of Science in Computer Science and Mathematics*

May 2028

**Relevant Coursework:** Statistics & Stochastic Processes, Differential Equations, Linear Algebra,

GPA: 3.9/4.0

Artificial Intelligence, Multivariable Calculus, Data Structures & Algorithms, Object-Oriented Design

## SKILLS & INTERESTS

**Languages:** Python, TypeScript, JavaScript, Java, C++, C#, HTML, CSS, SQL

**Frameworks & Libraries:** NumPy, Pandas, Scikit-learn, Flask, Selenium, Angular, React.js, Next.js, Node.js, Prisma

**Services & Tools:** Git, Jira, Docker, Google Cloud Platform (GCP), Azure, AWS, Figma, Kubernetes

**Interests:** Financial Derivatives, Fitness, Tennis, Pickleball, Basketball, Football, Cricket, Journaling, Cooking, Podcasts

## WORK EXPERIENCE

### Databricks

Jan 2026 – Apr 2026

*Incoming Software Engineering Intern*

*Mountain View, CA*

### Amazon (AWS)

Jun 2026 – Aug 2026

*Software Engineering Intern*

*Seattle, WA*

- Automated on-call access to service team resources, driving more than 50% adoption across internal operations teams
- Reduced manual approvals for administrators by processing permission team updates asynchronously with AWS SQS
- Tightened access control by automatically removing permissions for engineers who rotate off-call using AWS Lambda

### Microsoft

Jan 2026 – May 2026

*Software Engineering Intern*

*Redmond, WA*

- Built a .NET MCP server powering the M365 Admin Agent to expose Agent 365 observability data for enterprise workflows
- Designed 50+ eval scenarios to test MCP tool selection and response quality, reducing risk before production rollout
- Implemented internal ingestion tooling for 500K+ agents observability data, enabling production-scale load testing

### Northeastern Autonomy & Intelligence Lab

Apr 2025 – Dec 2025

*Research Assistant*

*Boston, MA*

- Developed a Python data-processing pipeline to extract and analyze ROS2 sensor data, cutting download sizes by 75%
- Deployed an Ubuntu server with DAS to store 100+ TB of sensor data, reducing infrastructure costs by \$2000+/month
- Configured Cloudflare Tunnel and Access to securely expose app via HTTPS to remote users with Northeastern credentials

### Bambala (Startup)

Jan 2023 – Sep 2024

*Software Engineering Intern*

*East Brunswick, NJ*

- Developed REST API's on Google App Engine to integrate digital payments, boosting transaction reliability by 25%
- Built a Cypress automated testing framework, cutting QA time by 50%, and ensure stable deployments in production
- Refactored Angular codebase using the NgRx state design pattern, enhancing maintainability and cutting state bugs by 30%

## PROJECTS

### Equity Research Screener

Python | matplotlib | scikit-learn | Excel

- Developed an equity research screener with Python, Pandas, and Scikit-learn to analyze 20 years of 10-K's and macro data
- Trained regression models on all 500 S&P firms', forecasting fundamental business valuation metrics to rank stocks
- Backtested factor models on predicted EBIT/EV, with a long portfolio having ~15% annualized return, beating the S&P 500

### Zerodha Automation Trading

Python | Flask | Next.js

- Engineered an automated derivatives trading system executing delta-hedged option strategies with Python and Next.js
- Integrated Zerodha API for real-time option chain data, trade execution, and P&L monitoring across weekly/monthly expiries
- Simulated order book and position adjustments to validate risk management logic and streamline workflow automation

### NUTrition

Python | scikit-learn | Selenium | React.js | Supabase

- Built a full-stack meal tracking app using React, Supabase, and Vercel, enabling students to log meals and monitor macros
- Implemented a Python-based ML model to recommend meals aligned with users' goals, preferences, and dining history
- Coordinated with Northeastern dining services to pilot the app and collect live feedback from students in dining halls
